ANSHIKA SHRIVASTAVA

UI/UX DESIGNER | **PRODUCT DESIGNER** | **FRONTEND DEVELOPER**

+91-9368313920 | shrivastavanshika95@gmail.com | Github | Linkedin |Portfolio

SUMMARY

UI/UX Designer who takes ideas from user problem to implementation-ready solution: user research, flows and information architecture, interactive prototypes in Figma, and scalable design systems. Designs for behavior and clarity, so dashboards and everyday workflows are easy to understand and act on. Front-end grounding in HTML, CSS, JavaScript and React.js helps bridge design and engineering, and keeps handoff practical.

EXPERIENCE

TREE MULTISOFT SERVICE **June 2026 - Sep 2026**

- Translated UI/UX designs and Figma prototypes into pixel-perfect, responsive web interfaces using HTML5, CSS3, and JavaScript.
- Designed and implemented responsive dashboards and user interfaces focused on usability, accessibility, and clear data visualization across 3+ device types.
- Conducted UI testing, debugging, and iterative improvements based on usability and performance feedback to enhance the overall product experience.

UI/UX DESIGNER INTERN - Self Employeed **Jan 2025 - Dec 2025**

- Designed and developed responsive web interfaces from Figma prototypes, translating product requirements into pixel-perfect, user-focused experiences using HTML5, CSS3, and JavaScript.
- Managed end-to-end UI implementation, from understanding requirements and refining designs to development, testing, debugging, and performance optimization.

UI/UX DESIGNER INTERN - InternPe **July2024– Sep 2024**

- Designed user flows and wireframes for a quiz application, focusing on intuitive navigation and smooth user interaction
- Created low- and high-fidelity prototypes for key features, including question flow, timer functionality, and result feedback screens
- Applied usability principles to enhance user experience through clear interface design, effective feedback systems, and engagement-driven interactions

PROJECTS

HOME AUTOMATION MANAGEMENT SYSTEM - Product Design / User centric UI/UX design(Case Study) github.com/anshikashri9368/UI-UX-Designs

- Designed a user-friendly home automation management system to streamline the home automation, and performance tracking.
- Created user flows, wireframes, and high-fidelity prototypes in Figma to ensure intuitive navigation and efficient workflows
- Focused on dashboard design and information hierarchy to improve data accessibility for students and administrators

DESIGN SYSTEM - UI/UX design github.com/anshikashri9368/UI-UX-Designs

- Designed a comprehensive design system in Figma to maintain visual consistency and improve scalability across digital products
- Established design foundations including typography, color system, spacing, and layout grids
- Developed reusable and responsive components (buttons, inputs, cards, navigation) to streamline design workflows

EXPENSE TRACKER - UI/UX design / /Product Design github.com/anshikashri9368/UI-UX-Designs

- Designed a smart expense tracking system to help users manage spending and improve financial decision-making
- Conducted user research to identify pain points in manual expense tracking and lack of financial awareness
- Created user flows, wireframes, and high-fidelity prototypes in Figma for seamless and intuitive interactions

DESIGN SKILLS

- **Design & Prototyping :** Figma (Wireframing, Prototyping, Auto Layout, Components, Variants), Adobe XD, Sketch, Design Systems, Style Guides, High-Fidelity UI Design, Responsive Design ,Cross-Platform(Web and Mobile)
- **UX Research & Process :** User Research, User Personas, User Journey Mapping, User Flows, Information Architecture, Low/High-Fidelity Wireframing, Usability Testing, Heuristic Evaluation, Design Thinking
- **UI & Visual Design :** Interaction Design, Visual Hierarchy, Typography, Color Theory, Mobile-First Design, WCAG Accessibility
- **Design Tools :** Figma, Canva, Adobe Express, Miro, Zeplin
- **Frontend Knowledge :** HTML5, CSS3, Bootstrap, React.js, JavaScript
- **Collaboration & Process :** Agile, Scrum, Design Handoff, Cross-Functional Collaboration, Git, GitHub
- **Additional Skills :** Product Thinking, Problem Solving, User-Centered Design, Basic Accessibility Principles

EDUCATION

Bachelor of Technology in Computer Science And Engineering **Sep 2022- Aug 2026**

Quantum University(Roorkee) **| CGPA:8.6/10**

CERTIFICATION AND EXTRA CURRICULUM

Certifications

- UI/UX Designing by Mind Luster
- Introduction of GenAI by Simplilearn(Powered by Google)
- Product Management by Geeks for Geeks

Awards/Activities:

- Participated in Hack2Skill powered by GoogleIoT Workshop By Gurukul Event
- Management Assistant in Shrijan(StartUp Mela) , Core Member of Startup Club
